

Landscape Architect/Designer Sambatek, Inc.

Sambatek is currently seeking a Landscape Architect/Designer for our Landscape Architecture group. This individual will collaborate on exciting landscape architecture projects within our Land Development team.

Sambatek supports a dynamic, collaborative work environment and we embrace challenging projects and work hard to help our clients find success. We are a vibrant organization that believes integrity, value, and outstanding service are the foundations of a great company.

Duties and Responsibilities:

- Work in collaborative integrated teams of professionals that include civil engineers, planners, environmental scientists, architects, transportation engineers, and building systems engineers
- Review and interpret regulatory codes, ordinances, and comprehensive plans
- Use in depth knowledge of woody and herbaceous plant materials in preparing planting plans and landscape master plans
- Review and analyze land features relating to opportunities and constraints for development
- Prepare due diligence analysis, land development concepts, design development plans and graphic illustrations using both digital and hand drawn formats
- Work with senior landscape architects to develop and refine design solutions
- Participate in project meetings with staff, clients, & regulatory agencies
- Assist in editing technical plans, details, and specifications
- Visit construction sites to gather information, review design intent, inform and support senior project team members during the construction phase
- Consult with product manufacturers, evaluate and select construction materials

Required Experience:

- Degree in Landscape Architecture
- 0-5 years of professional experience
- LA registration or working towards registration
- Experience in construction drawing development
- Computer skills including AutoCAD, Sketch-up and Adobe Creative Suite (Photoshop, Illustrator, In-design), Microsoft Word, and MS Excel
- Strong regional plant knowledge
- Technical knowledge of landscape architectural site development elements and materials
- Technical knowledge of construction details and methods
- Excellent written and oral communication skills
- A positive attitude, willingness to learn, and a strong work ethic

- Portfolio or work samples will be required if considered for an interview
